DETAILED ACTION

1. Claims 9-11 and 15 are all the pending claims in this application.
2. Claims 12-14 were cancelled, new Claim 15 was added and Claim 9 was amended in the Response of 4/28/10.
3. Claims 9-11 and 15 are all the claims under examination.

Withdrawal of Rejections

Claim Rejections - 35 USC § 112, second paragraph

4. The rejection of Claims 9-14 for failing to define the meaning of “a control value” against which the sample measurement is compared is withdrawn.

Applicants have amended Claim 9 to indicate that a control value is normal or healthy equivalent.

Claim Rejections - 35 USC § 112, first paragraph

Written Description/ New Matter

5. The rejection of Claims 12-14 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement because the claims are drawn to a GPC3 detection method where GPC3 mRNA or cDNA is detected in the body fluid for example a serum sample is withdrawn and moot for the cancelled claims.

Enablement

6. The rejection of Claims 9-11 under 35 U.S.C. 112, first paragraph, because the specification does not reasonably provide enablement for practicing a diagnostic method using any anti-GPC3 antibody directed to any epitope on the protein and in the absence additional art-recognized melanoma biomarkers is withdrawn.

Applicants have added new Claim 15 drawn to the characteristics of the antibody and the use of additionally clinically relevant biomarkers in the method assay. MPEP 806.04(d) states in part "In general, a generic claim should require no material element additional to those required by the species claims, and each of the species claims must require all the limitations of the generic claim." In other words, a generic claim embraces all species claims, thus the dependent claim elements are read into generic claim 9.

Enablement

7. The rejection of Claims 12-14 under 35 U.S.C. 112, first paragraph, because the specification does not reasonably provide enablement for a diagnosing risk for malignant melanoma based on quantitating the GPC3 mRNA or cDNA much less in the absence of quantitating another art-recognized melanoma marker and that would allow a risk assessment of the subject to melanoma is withdrawn and moot for the cancelled claims.

Enablement

8. The rejection of Claims 12-14 under 35 U.S.C. 112, first paragraph, because the specification does not reasonably provide enablement for a detecting GPC3 mRNA in any sample including any fluid sample from a melanoma patient is withdrawn and moot for the cancelled claims.

Examiner's Statement of Reasons for Allowance

9. The following is an examiner's statement of reasons for allowance: the use a glypican 3 (GPC3) as a tumor biomarker for detecting malignant melanoma in a subject sample with an antibody reagent is free from art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. Claims 9-11 and 15 are allowed.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LYNN BRISTOL whose telephone number is (571)272-6883. The examiner can normally be reached on 8:00-4:30, Monday through Friday.
